Welcome to CUI's **W3 Catalog**, a searchable catalog of W3 resources.

There are currently **4697** entries. There is some redundancy amongst the various sources, but a bit of noise seems acceptable to increase your chances of finding what you're looking for.

DISCLAIMER: We have no control over the contents of the consulted documents. If you find dead links in the catalog, you should notify the maintainer of the source document, *not us*. (The only exception is to out-of-date "What's New" entries from previous months, which may be corrected for use in the catalog.)

The following sources (*see also:* **local mirrors of these pages**) are consulted daily and used to update the catalog:

- **NCSA What's new** (nwn)
- NCSA's **NCSA Starting Points** (nsp)
- CERN's W3 **Virtual Library Subject Catalog** and selected sub-lists (cvl)
- Martijn Koster's Aliweb Archie-like Indexing for the Web (ali)
- Scott Yanoff's **Internet Services List** (isl)
- Simon Gibbs' list of **Multimedia Information Sources** (mis)
- John December's list of **Computer-Mediated Communication** Information Sources (cmc)
  and **Internet Tools Summary** (its)
- Marcus Speh's **User Documents** for DESY and HEP (msp)

Notification of *new* W3 services should be sent to **www-announce@info.cern.ch** for inclusion in the W3 Virtual Library and to **whats-new@ncsa.uiuc.edu** for inclusion in the NCSA What's New list (but not to me). You can also register services with Aliweb (Archie-Like Indexing for the Web) by filling in ***this form***. New services registered will be will be automatically reflected in this catalog.

Other searchable catalogs can be found on the list of **W3 Search Engines** and CERN's list of **Virtual Libraries**. You might also want to consult the local list of **W3 FAQs and Guides**.

If you want to consult the downloaded source files, look at the **W3Catalog**
