
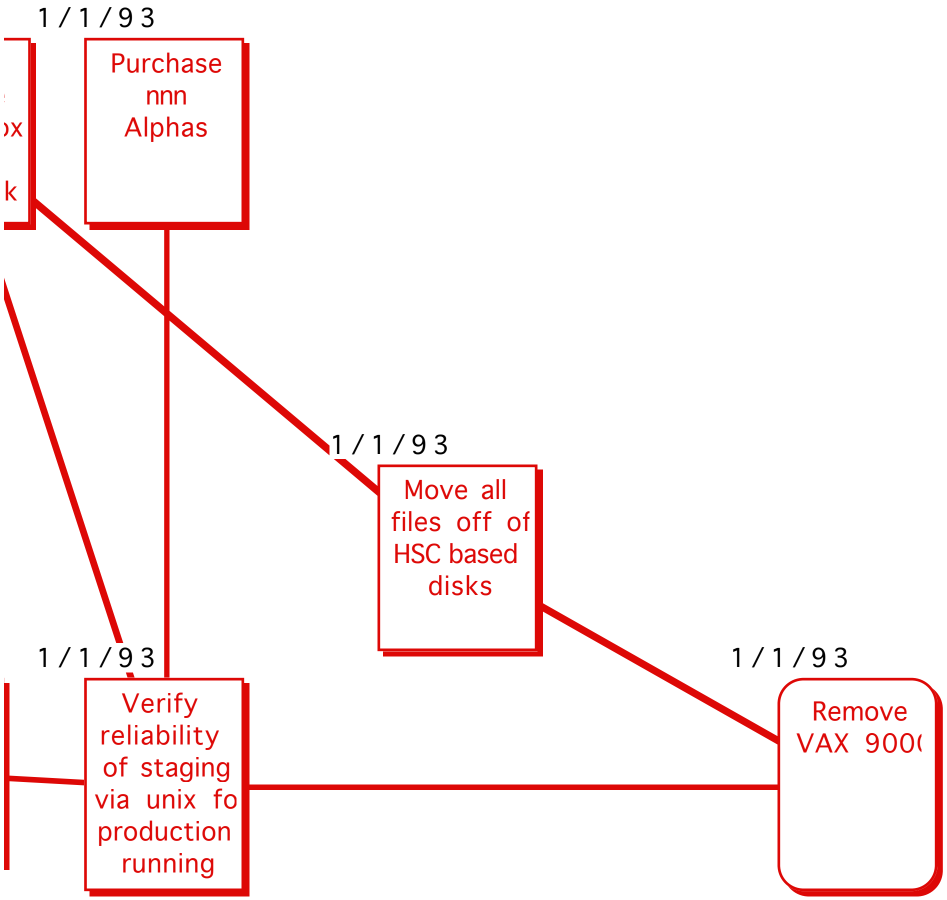
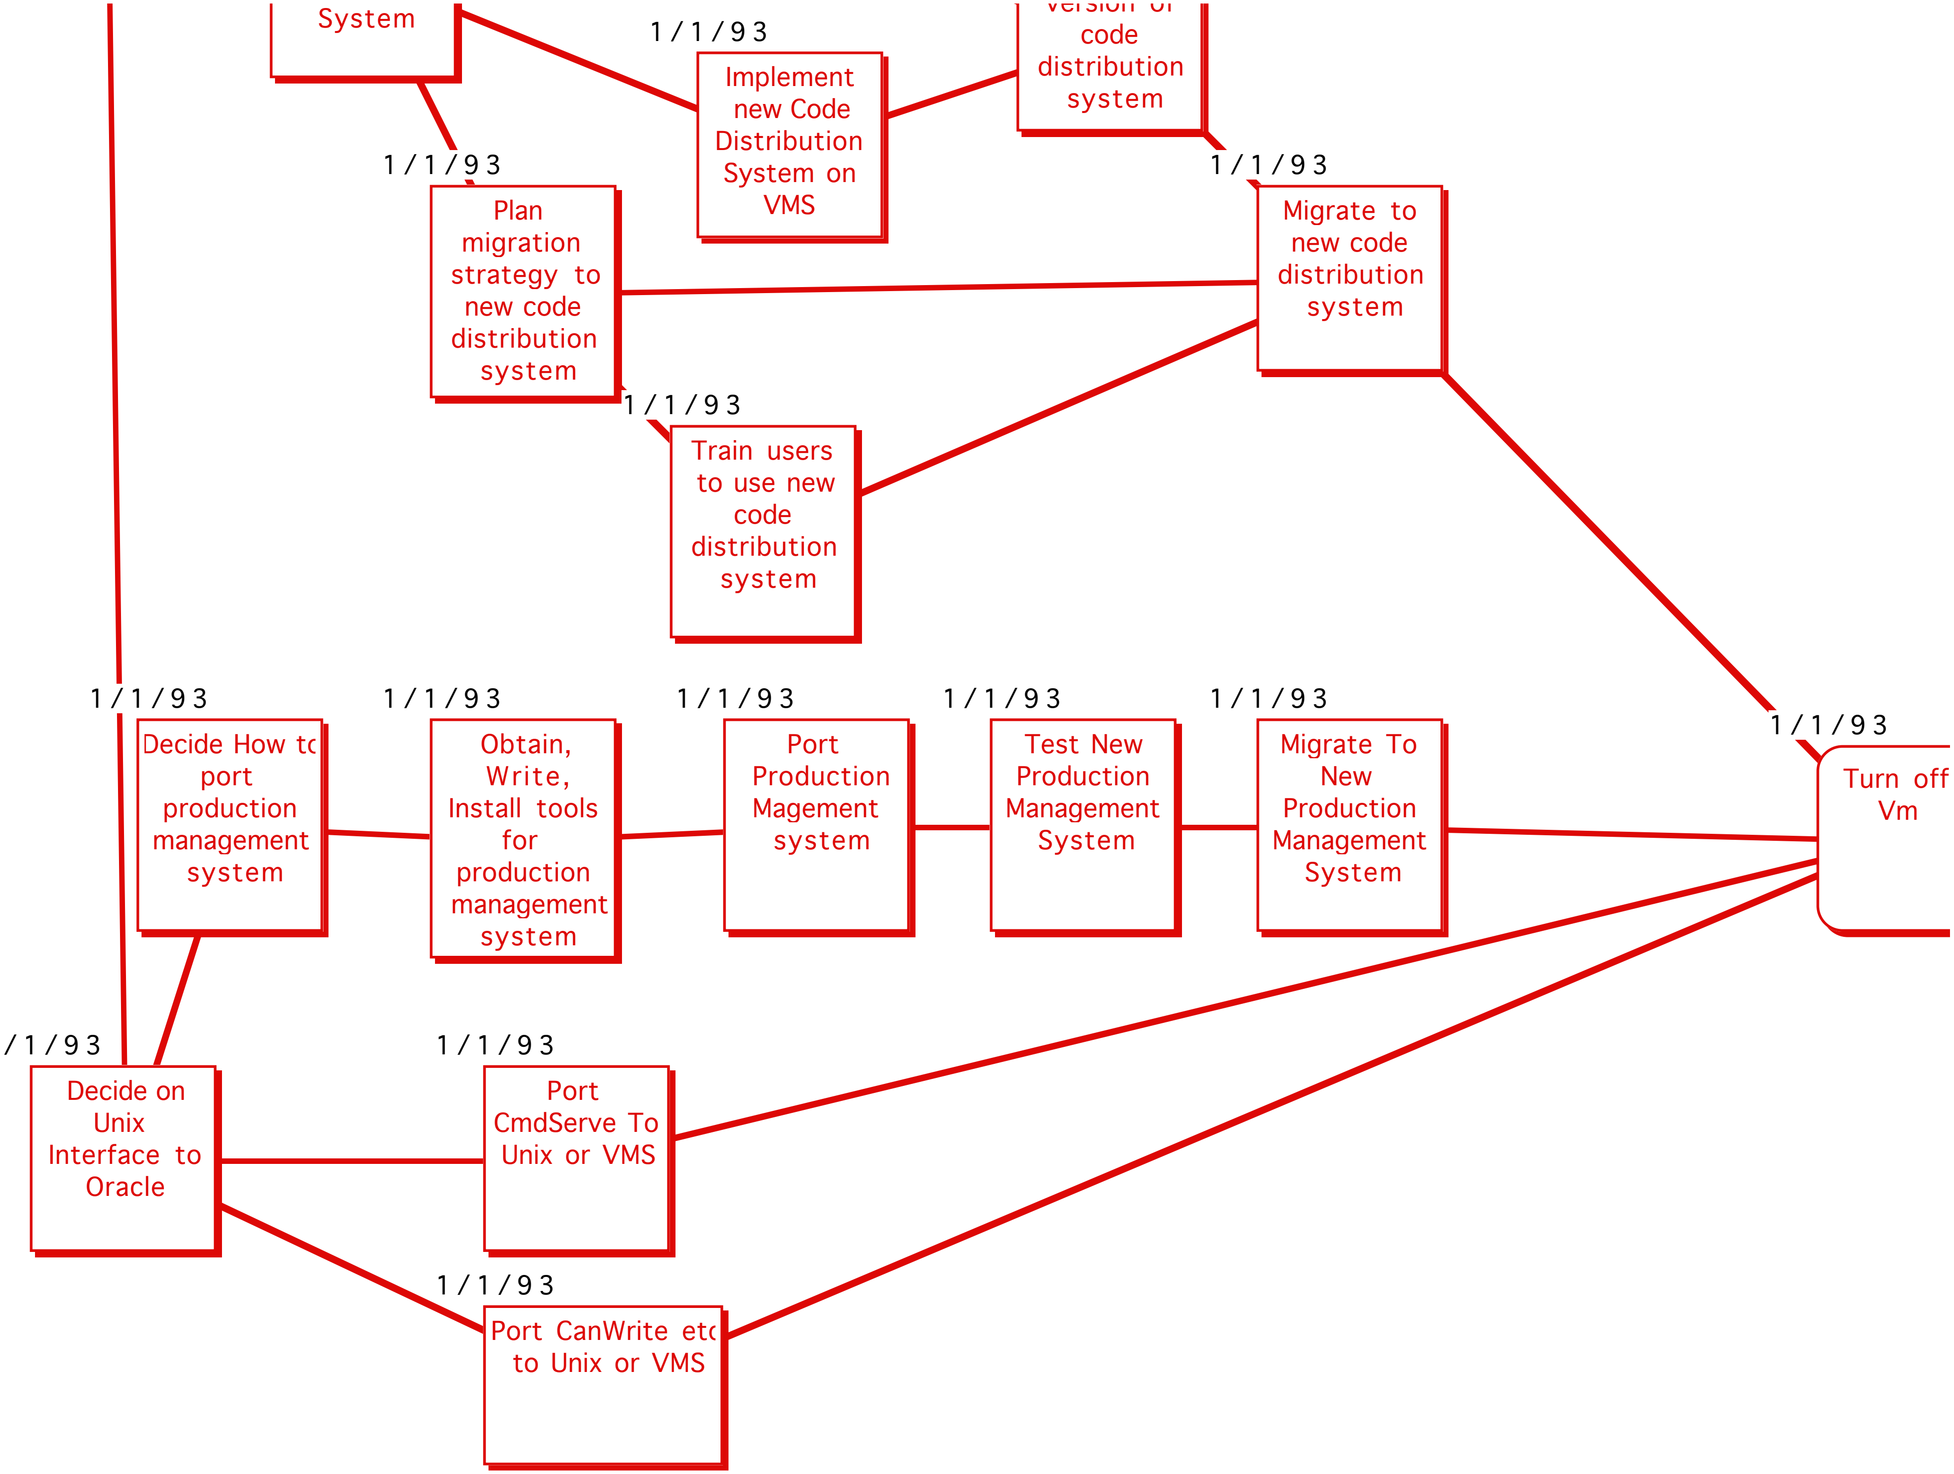
/ 1 / 9 3
Provide Support for WorkBench
SCS
1 / 1 / 9 3
Decide What Unix Platforms to Support for SLD
sld+scs
1 / 1 / 9 3
Decide on High Bandwidth Analysis Machine
1 / 1 / 9 3
Decide on computer Center Network Topology
1 / 1 / 9 3
Decide on future of setup, Tape Management System
1 / 1 / 9 3
Decide on future SLAC graphics standard
1 / 1 / 9 3
Purchase Storage Works bc plus nnnGB dis
1 / 1 / 9 3
Provide reliable access to silo from Unix
1 / 1 / 9 3
Provide reliable Staging system for Unix
1 / 1 / 9 3
Install CERN tpread, tpwrite on VMS
1 / 1 / 9 3
Install PAW on high bandwidth machine
1 / 1 / 9 3
Decide on F90/F77 compiler
I / 9 3
Hire Mystery Person 1 (MP1) and Mystery Person 2 (MP2)
1 / 1 / 9 3
Write unix memory management routines for Jazelle
1 / 1 / 9 3
Unix based Ntuple Analysis facility for SLD
1 / 1 / 9 3
Interface OPENTAPE/ Jazelle to tpread, tpwrite on
1 / 1 / 9 3
Move "master" jazelle to Workbench
1 / 1 / 9 3
Implement Dynamic loading for supported
1 / 1 / 9 3
Complete port of Jazelle (minus IO) to unix
mp1
1 / 1 / 9 3
Write utility for exporting Jazelle to DUCS
mp1
1 / 1 / 9 3
Implement new Code Distribution System on Unix
1 / 1 / 9 3
Design new Code Distribution Management
1 / 1 / 9 3
Set up Test



1/1/93
Purchase nnn Alphas
1/1/93
Move all files off of HSC based disks
1/1/93
Verify reliability of staging via unix fo production running
1/1/93
Remove VAX 900



System
1/1/93
Implement new Code Distribution System on VMS
code distribution system
1/1/93
Plan migration strategy to new code distribution system
1/1/93
Migrate to new code distribution system
1/1/93
Train users to use new code distribution system
1/1/93
Decide How to port production management system
1/1/93
Obtain, Write, Install tools for production management system
1/1/93
Port Production Magement system
1/1/93
Test New Production Management System
1/1/93
Migrate To New Production Management System
1/1/93
Turn off Vm
/1/93
Decide on Unix Interface to Oracle
1/1/93
Port CmdServe To Unix or VMS
1/1/93
Port CanWrite etc to Unix or VMS
